

HP Driver Configuration Utility (DCU)

Release Notes

The HP Driver Configuration Utility (DCU) is a small Windows application used to edit the configuration file associated with a particular driver. The configuration file defines the default printer settings for the driver applied at the time of installation. The settings defined within the DCU take effect when the printer is installed.

1.0.0.38	July 2009	Add/Delete default short cuts	UPD v5.0 or Later
1.0.0.29	November 2008	Printer Auto Configuration	UPD v4.7 or Later
1.0.0.26	March 2008	Configure Status Notification Popup (enable/disable)	UPD v4.5 or Later

Driver Configuration Utility is bundled with PARK tool available on www.hp.com/go/upd

NOTE: DCU version can also be checked from the file properties of hpbcfgui.dll

Description

The HP Driver Configuration Utility (DCU) is a small Windows application used to edit the configuration file associated with a particular driver. The configuration file defines the default printer settings for the driver applied at the time of installation. The settings defined within the DCU take effect when the printer is installed.

The HP Driver Configuration Utility (DCU) does not perform the tasks of installation or driver deployment. Rather, DCU is a file editor used to define the installation defaults such as duplex enabled, print in grayscale, etc. The settings are saved to a driver configuration file which is utilized to establish the newly installed printer's default settings at the time of installation from any of the UPD's supported installation methods (install.exe, Microsoft's Add Printer Wizard, PrintUI, etc.).

Please reference the HP Universal Print Driver System Administrator's Guide and the HP Driver Configuration Utility documentation for full details installing and using the utility.

The DCU program is available for download in the HP Printer Administrator Resource Kit (PARK) from www.hp.com/go/upd

Update recommendation

Recommended/Advised – Includes new enhancements, features, and/or minor bug fixes. HP recommends all customers to update.

Product Models

DCU supports the HP Universal Print Driver (UPD) and model-specific printer drivers, which have a CFG file in the driver package.

Devices Supported

Refer to the specifications tab at www.hp.com/go/upd for a list of devices, which are supported by the HP UPD.

Operating Systems

- Microsoft Windows 7 SP1*
- Microsoft Windows 8 / 8.1
- Windows 10
- Microsoft Windows Server 2008 SP2 / 2008R2 SP1
- Microsoft Windows Server 2012 / 2012R2

*Microsoft has ended mainstream support for this operating system.

NOTE: DCU is a 32-bit application but will run on 64-bit operating systems

Languages

The Driver configuration utility (DCU) is available in the following 35 languages:

Arabic	Finnish	Latvian	Slovak
Bulgarian	French	Lithuanian	Slovenian
Catalan	German	Norwegian	Spanish
Croatian	Greek	Polish	Swedish
Czech	Hebrew	Portuguese (Brazilian)	Thai
Danish	Hungarian	Romanian	Traditional Chinese
Dutch	Italian	Russian	Turkish
English	Japanese	Serbian (Latin)	Ukrainian
Estonian	Korean	Simplified Chinese	

Enhancements/Features

- Resolve issue where username watermark is blank in DCU tool in Chinese OS

Issues and Workarounds

Do not pre-configure Personal Job Locked for the HP MFP S900 series devices. Personal Job is not supported on these devices.

Installation instructions

No installation is necessary. Copy the contents of the Driver Configuration Utility directory to the desired directory on the hard drive of the client computer where HP UPD and/or device-specific printer drivers will be preconfigured.

Usage

For usage instructions, please see the Driver Configuration Support Guide included with the utility.

A training video for this utility is available on YouTube. Use the following link to access this training:
<http://youtu.be/4jx1jBXrVUU>

CFG/CFM File support

From UPD 5.1 onwards, the UPD supports hpcpu*.cfg and hpcpu*.cfm files only.

Note: UPD 5.0 or Older uses *.cf_ file instead of *.cfg file.

Which configuration file can be used with HP UPD?

Configuration File Name	Supported UPD version
C:\Windows\system\..\3\hpcpu*.cfm Step 1 – Copy the hpcpu*.cfm file to above directory Step 2 – Install the UPD	UPD 4.x or Later
Install.exe /gcfm"C:\Windows\system\..\3\hpcpu*.cfm" Install.exe /gcfm"C:\temp\duplex.cfm"	UPD 5.2 or Later
hpcpu*.cfg Warning – Using the *.cfg file will break WHQL (Not recommended)	UPD 5.1 or Later

NOTE: HP recommends using *.cfm files.
